arginine binding	
regulation of translational fidehty oline-5-carboxylate reductase Cellular biosynthetic process	
tRNA (guanine-N7-)-methyltransferase act	RNA-DNA hybrid ribonuclease activity
uracil phospho	ribosyltransferase activit –terminal protein amino acid acetylatio
protein dimerization activity orotate phosphoribosyltransferase activininoacyl–tRNA hydrolase activity transferase activity, transferring alkyl	
purine-containing compound salvage	dolarini lodoyi titti tiyaroldoc dolitity samerene samyi amin'i
	proton-transporting ATP synthate 3-epimerase activity
	pid transport riboflavin transmembrane transporter act
carbohydrate transport	protein modification process
nucleotidase activity	phosphoribosylaminoimidazolesuccingoarb Biosynthetic process
hydrolase activity, acting on carbon-nit	CTP synthase activity propho—CoA kinase activity ribonucleoside monophosphate biosyntheti
ATP synthesis coupled proton transport	biotin transport purine nucleotide biosynthetic process
chromosome separation galactokinase activity	NAD metabolic process
	ribose phosphate diphosphokinase activit
adenyl-nucleotide exchange factor activi	Phatasatasblic process to kyntenizyme A biosynthetic process tRNA (adenine-N1-)-methyltransferase act
CTP biosynthetic process	
carbohydrate phosphorylation	peptidoglycan binding manganese ion transmembrane transporter peptidoglycan binding 2-am-ho-4-hydroxy-6-hydroxymethyldihydro
nucleobase-containing compound metabolic 3	
biotin transmembrane transmembrane transporter active Haemophilus paralinfluenzae nucleoside metabolic process	
	nucleoside metabolic process
proton transmembrane transporter activit	romate transport
proton transmembrane transporter activit	romate transport pyridoxal phosphate biosynthetic process
serine-tRNA ligase activity	pyridoxal phosphate biosynthetic process nucleotide biosynthetic process
proton transmembrane transporter activit	pyridoxal phosphate biosynthetic process nucleotide biosynthetic process rRNA processing modification DNA polymerase III complex
serine–tRNA ligase activity lipoteichoic acid biosynthetic process seryl–tRNA aminoacylation protein kinase acti	pyridoxal phosphate biosynthetic process nucleotide biosynthetic process rRNA processing a modification DNA polymerase III complex vity negative regulation of transcription, DN
serine–tRNA ligase activity lipoteichoic acid biosynthetic process seryl–tRNA aminoacylation protein kinase acti	pyridoxal phosphate biosynthetic process nucleotide biosynthet
serine–tRNA ligase activity lipoteichoic acid biosynthetic process seryl–tRNA aminoacylation protein kinase acti chaperone binding	pyridoxal phosphate biosynthetic process nucleotide biosynthetic process
serine–tRNA ligase activity lipoteichoic acid biosynthetic process seryl–tRNA aminoacylation protein kinase acti	pyridoxal phosphate biosynthetic process nucleotide biosynthetic process
serine—tRNA ligase activity lipoteichoic acid biosynthetic process seryl—tRNA aminoacylation protein kinase acti chaperone binding Cell division tyrosyl—tRNA aminoacylation	pyridoxal phosphate biosynthetic process nucleotide biosynthetic process and nucleotide biosynthetic process a
serine—tRNA ligase activity lipoteichoic acid biosynthetic process seryl—tRNA aminoacylation protein kinase acti chaperone binding Cell division tyrosyl—tRNA aminoacylation	pyridoxal phosphate biosynthetic process nucleotide biosynthet
serine—tRNA ligase activity lipoteichoic acid biosynthetic process seryl—tRNA aminoacylation protein kinase acti chaperone binding Cell division tyrosyl—tRNA aminoacylation	nucleotide biosynthetic process rRNA processing modification NA polymerase III complex vity negative regulation of transcription, DN NA repair L-alanine catabolic proces? S RNA binding e activity phosphatidylelycerol-prolipoprotein diac aminopeptidase activity amethyltransferiate activity vitamin B6 biosynthetic process organic acid phosphorylation
serine–tRNA ligase activity lipoteichoic acid biosynthetic process seryl–tRNA aminoacylation protein kinase acti chaperone binding Cell division tyrosyl–tRNA aminoacylation L–lactate dehydrogenase activity	remate transport Pyridoxal phosphate biosynthetic process nucleotide biosynthetic process nucleo
serine–tRNA ligase activity lipoteichore acid biosynthetic process seryl–tRNA aminoacylation chaperone binding Cell division tyrosyl–tRNA aminoacylation chaperone binding L–lactate dehydrogenase activity nicotinate phosphoribosyltransfet glycerate kinase activity single–strant	nucleotide biosynthetic process nucleotide biosynthetic proces
serine–tRNA ligase activity lipoteichole acid biosynthetic process seryl–tRNA aminoacylation protein kinase acti chaperone binding Cell division tyrosyl–tRNA aminoacylation tyrosyl–tRNA aminoacylation L–Jactate dehydrogenase activity nicotinate phosphoribosyltransfer glycerate kinase activity xanthine metabolic process	pyridoxal phosphate biosynthetic process nucleotide biosynthetic process nucleotide biosynthetic process nucleotide biosynthetic process nucleotide biosynthetic process NA processing modification PNA polymerase III complex vity negative regulation of transcription, DN L-alanihe catabolic proces S RNA binding e activity phosphatidylglycerol-prolipoprotein diac aminopeptidase activityA methyltransferase nuclease activity vitamin B6 biosynthetic process organic acid phosphorylation pyrimidine nucleotide biosynthetic proce acyl-[acyl-carrier-protein] hydrolase activity tyrosine—tRNA ligase activity
serine—tRNA ligase activity lipoteichoic acid biosynthetic process seryl—tRNA aminoacylation protein kinase activity chaperone binding Cell division tyrosyl—tRNA aminoacylation tyrosyl—tRNA aminoacylation L—lactate dehydrogenase activity nicotinate phosphoribosyltransfer glycerate kinase activity xanthine metabolic process phosphoribosylglycinamide formyltransfer	pyridoxal phosphate biosynthetic process nucleotide biosynthetic process nucleotide biosynthetic process nucleotide biosynthetic process representation of transcription, DN NA repair L-alanine catabolic process S RNA binding e activity phosphalidylglycerol-prolipoprotein diac aminopeptidase activity witamin B6 biosynthetic process organic acid phosphorylation pyrindine nucleotide biosynthetic process pyrindine nucleotide biosynthetic proces pyrindine nucleotide biosynthetic proces pyrindine nucleotide biosynthetic proces tyrosine-tRNA ligase activity purins-nucleoside phosphorylase activity purins-nuc
