Pre−HIV vs Non−HIV
G4 versus G1
sulfur compound binding
oxidoreductase activity, acting on single donors with incorporation of molecular oxygen, incorporation of two atoms of oxygen
glutamate catabolic process to 2−oxoglutarate
glutamate dehydrogenase (NAD+) activity
L−fuculokinase activity
peptidoglycan beta−N−acetylmuramidase activity
regulation of gene expression
voltage−gated potassium channel activity
voltage−gated potassium channel complex
enterobactin synthetase complex
trehalose transport
trehalose transmembrane transporter activity
poly−beta−1,6−N−acetyl−D−glucosamine transmembrane transporter activity
glycopeptide alpha−N−acetylgalactosaminidase activity
mRNA processing
SNARE complex disassembly
polysaccharide catabolic process
UDP−N−acetylglucosamine metabolic process
protein serine/threonine kinase activity
protein splicing
autophagy
tRNA−specific ribonuclease activity
L−arabinose catabolic process
L−ribulose−phosphate 4−epimerase activity
gamma−aminobutyric acid metabolic process
4−aminobutyrate transaminase activity
nickel cation transport
creatine kinase activity
pectate lyase activity
phosphotransferase activity, nitrogenous group as acceptor
fructose 2,6−bisphosphate metabolic process
glucose−1−phosphate cytidylyltransferase activity
rhamnose metabolic process
formate dehydrogenase (cytochrome−c−553) activity
hydroxymethyl−, formyl− and related transferase activity
thymidylate synthase activity
histone methyltransferase activity (H3−K79 specific)
organelle inner membrane
N−acetylglucosamine transmembrane transporter activity
dTMP biosynthetic process
2−succinyl−5−enolpyruvyl−6−hydroxy−3−cyclohexene−1−carboxylic−acid synthase activity
molybdopterin synthase complex
mannitol metabolic process
2',3'−cyclic−nucleotide 2'−phosphodiesterase activity
formate metabolic process
protein processing
nitrate reductase activity
virion attachment to host cell
carbon−monoxide dehydrogenase (acceptor) activity
GDP−mannose 4,6−dehydratase activity
L−arabinose isomerase activity
DNA ligase (ATP) activity
protein secretion by the type VI secretion system
aconitate hydratase activity
oleate hydratase activity
NADH oxidation
hydrogen−translocating pyrophosphatase activity
inorganic cation transmembrane transport
cysteine−glucosaminylinositol ligase activity
2,3−bisphosphoglycerate−independent phosphoglycerate mutase activity
protein−DNA covalent cross−linking
endopeptidase inhibitor activity
oxidoreductase activity, acting on NAD(P)H, heme protein as acceptor
heme a biosynthetic process
nucleoside diphosphate metabolic process
intein−mediated protein splicing
thymidylate synthase (FAD) activity
bacterial−type flagellum filament cap
protein secretion by the type III secretion system
type III protein secretion system complex
LFC
